

# Neuropsychological Test Battery

## Patient Information

Name: Biggie Age: 23 Battery type: Full A

Referral question: ADHD, asd

---

## Selected Tests

```
library(dplyr)
library(knitr)

tests <- params$selected_tests

if (is.null(tests) || nrow(tests) == 0) {
  cat("No tests selected.")
} else {
  tests |>
    arrange(battery_group, phase, test_name) |>
    select(battery_group, phase, test_name, required, notes) |>
    mutate(
      Required = ifelse(required, "Yes", "No")
    ) |>
    select(Battery = battery_group,
           Phase = phase,
           Test = test_name,
           Required,
           Notes = notes) |>
    kable()
}
```

Battery	Phase	Test	Required	Notes
Phase 1A	Phase 1A	Clock Drawing (ppt)	Yes	Phase 1A; required
